PROJECTS

Real-Time Collaborative Code Editor — 2025 – 2026

Tech: React.js, Node.js, Express.js, Socket.IO, JavaScript

- Built a full-stack code editor where multiple users write and edit code together in real time.
- Implemented live code synchronization and room-based collaboration using WebSockets (Socket.IO).
- Developed a responsive React.js interface backed by a Node.js and Express.js server.

Query AI – AI SQL Query Generator — 2024 – 2025

Tech: React, FastAPI, PostgreSQL, Groq LLM

- Built an AI-powered application that converts natural-language questions into executable SQL queries.
- Integrated Groq LLM for SQL generation and PostgreSQL for query execution.
- Implemented schema discovery and relationship detection to improve the accuracy of generated queries.
- Developed REST APIs with FastAPI and a responsive React interface.

Sprite AI Assistant & Business Website — 2023 – 2024

Tech: React.js, Node.js, Express.js, MongoDB, JavaScript

- Developed an AI-powered business website with an intelligent virtual assistant for customer interactions.
- Built responsive React.js interfaces and integrated AI-driven customer conversations.
- Designed backend APIs and the MongoDB database structure for efficient data management.
